Education

Universidad de Buenos Aires (UBA), Buenos Aires, Argentina
B.Sc. in Software Engineering — March 2022 – Expected 2027

Escuela de Educación Secundaria Técnica N°2, Quilmes, Argentina
Electronics Technician Degree — March 2014 – December 2020

Work Experience

Alkemy — Remote
Junior Full-Stack Developer — October 2025 – Present

- Development and maintenance of full-stack applications using NestJS (TypeScript) and React (TypeScript).
- Experience with relational and non-relational databases, including MariaDB and MongoDB.

Faculty of Engineering, Universidad de Buenos Aires (UBA) — Buenos Aires, Argentina
Teaching Assistant, Algorithms and Data Structures — March 2023 – Present

- Covered topics including data structures, computational complexity and divide-and-conquer technique.

Projects

Money Laundering Analysis

- Fault tolerant distributed data pipeline focused on performance and scalability.
- Support for multiple concurrent clients with different datasets.
- *Technologies:* Go, RabbitMQ.

Spotify Clone (Mobile Application)

- Backend designed with a microservices architecture.
- Implemented JWT-based authentication and authorization.
- Audio and video streaming support.
- *Technologies:* Go (Chi/Gin), React, React Native, Kafka.

Counter-Strike 2D Remake

- Client–server architecture.
- Support for multiple concurrent games with multiple players per session.
- Focus on networking, game logic, and real-time interaction.
- *Technologies:* C++, Qt, SDL.

Skills

Programming Languages: Go, C++, Python
Web & Backend: Node.js (TypeScript), React
Databases: SQL, MongoDB, Neo4j, MariaDB
Cloud: AWS (SQS, EC2, ElasticBeanstalk, RDS, DynamoDB)
